Key Queue Systems

Introduction:

Time is a quantity that is non-renewable and continuous. Any process that saves time and space is considered vital in many applications. Time is an important quantity, which must be efficiently managed.
Wasting time in a queue is always nonnegotiable and it is in this, that the present queue management system finds its importance, the idea of the system starts with a simple question "How could time be smartly utilized?"

This smart queue management system will take out the burden of waiting in a long queue until one gets attended.

System Features

- **Keylife Electronics queueing system is windows base system that made by our engineers.**
- **The system supports English, Arabic, and multi-Languages.**
- **The system provides the waiting list with LIVE MONITORING.**
- **The system can extract several types of detailed reports.**
- **The system is made in Jordan.**
- **Our queueing system able to transfer the tickets between counter without new ticket.**
- **Keypad is software with login authentication for each user with function (call, recall, next, store and transfer)**

- **The ticket contains Date, Time, Number, waiting number, welcome message and other, Will cut partially which allows the client to pick the ticket easily.**
- **The dispenser contains 17-inch, 19-inch, 21.5-inch capacitive touch display High accuracy.**
- **System is made in 2024.**
- **Sound System with number of Speaker (as location required)**
- **Display contains two digits green as counter number and five digits red color as ticket number flashing three times to notify the client.**
- **Flexible and reliable regarding programmable queue management**
- **RESTful API to integrate with external services.**

Reports

- **The system can generate numerous types of reports.**
- **The reports could be generated daily, monthly or customized as per the client's request.**
- **The reports could be extracted in Excel, Word, and PDF format.**
- **The system can generate several types of report (Spend time, service, Summery).**
