KLQ140

Product Overview

The Kiosk KLQ140 is a high-performance ticket dispenser system designed to streamline queue management. Equipped with a 17-inch,19-inch or 21.5-inch high-accuracy touch screen, powerful processing capabilities, and advanced software features, the KLQ140 offers an all-in-one solution for various business environments.

Specifications

Display Specifications

- **Dimensions Stand 40 x 30 x 115 CM**
- **17-inch, 19-inch or 21.5-inch High Accuracy Touch Screen**
- **Supports multi-touch input**
- **Ideal for high-traffic environments with easy navigation**

Hardware Specifications

- **Processor : Intel Core i3, i5, i7**
- **Memory (RAM) : 4GB, 8GB,16GB**
- **Storage : SSD 256GB, 512,GB, 1T, Hard Disk**
- **Operating System: Windows 10,11**
- **Amplifier : 30W, 60W, 120W**
- **Switch POE : 96W, 130W, 260W (Optional)**
- **Vandal-resistant design for secure installations**
- **Color : Black, White, Grey**

Features

- Real-Time Monitoring of Branches and Centralized Reporting
- Detailed reports at branch and headquarters level
- multi-language support, customizable button labels
- Fast printer with heavy-duty cutter
- Customizable system colors and interface settings
- Batlin KeyQ System
- Compatible with WAQTAK APP (Optional)

Printer Features

- High Speed Printer 250mm/s (max)
- Printing width 80mm (max)
- Automatic Cutting Method Full / Partially cut
- Anti-paper jam system
- Smart paper bezel with LEDs
- Operation temperature -10 ~ 60 C
- Operation Humidity 20% ~ 80%
- Voltage is DC24±10% V
- Made in China (High Quality)
- Heavy duty Cutter
- Can carry 150 meter paper Roll
- Ability to Print Ticket with Logo, Welcome message Date and Time, Type , The Last Service & waiting No.

Software Features

- Real-time monitoring of branches
- Permission control for services and users
- multi-service support with no additional development needed

Customization Options

- Fully customizable color options to fit any branding requirements
- Multilingual interface with the ability to modify service labels and button text
- Integrated queuing software included
- Administrator permissions for user control and service management

Build Quality and Reliability

- **Made in Jordan by our expert engineering team**
- **Vandal-resistant and durable design for high-traffic environments**
- **Expected lifecycle: 100,000 hours of operation**

Connectivity

- **USB, Ethernet, and RS485 connectivity**
- **Supports integration with LED screens for queue display**
- **Optional remote monitoring and control features**

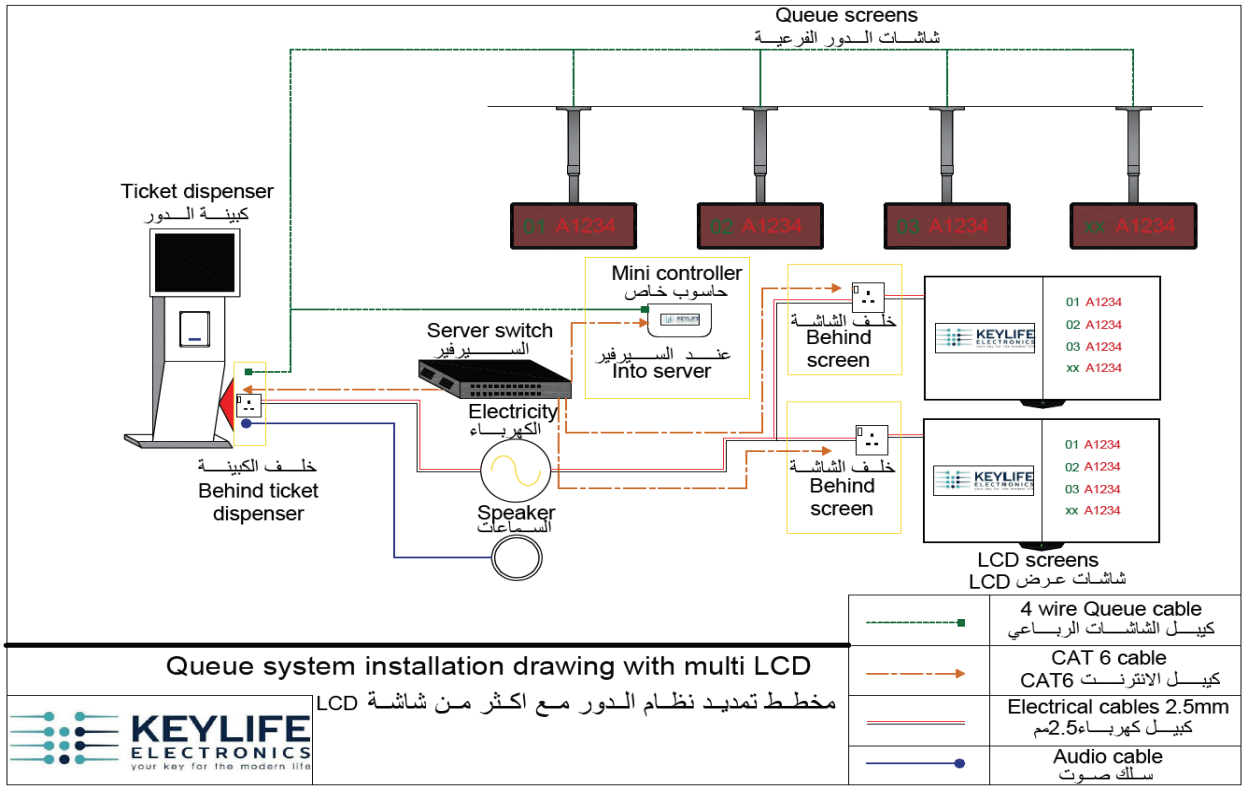

Power and Environmental Requirements

- **Power Input: 220V AC**
- **Operating Temperature: -10°C to 50°C**
- **Humidity: 20% - 70% non-condensing**

Manufacture

- **Made in Jordan By Keylife Company**
